Experience

Mar 2026 - Present

Walton · Co-Founder & CTO

Autonomous legal transactions. Backed by Afore.

- Took the product from prototype to live users and LOIs from 4 law firms in 7 months.
- Built a durable, model-agnostic agent harness on Mastra: ~70 tools, hour-plus runs, upstream fixes.
- Created docx editing agents with workflows, parallel subagents, edit merging, and context compaction.
- Designed a workspace engine to bring Git-style drafting to lawyers for terms, documents, signatures.
- Shipped the deal workflow end to end: signature packets, party management, checklists, activity feed.

Jan 2025 - Mar 2026

Hyperbolic · Frontend Lead & Full-Stack Engineer

GPU marketplace and serverless inference for open-weight models.

- Architected a full-stack GPU rental aggregator over Nebius, Voltage Park, DigitalOcean, and more.
- Led frontend for a 5-engineer team and designed the Next.js + tRPC monorepo.
- Built an inference playground (chat, vision, image, audio) with AI SDK, OpenRouter, and shadcn/ui.
- Shipped enterprise foundations: team accounts, roles and permissions, multi-key API access.
- Published open-source TypeScript SDKs (AI SDK provider and API client).

Mar 2024 - Jan 2025

Enclave Markets · Contract Software Engineer · Encrypted crypto exchange.

Loreis · Co-Founder · Decentralized wiki platform.

Nov 2021 - Mar 2024

Ava Labs · Tech Lead & Staff Software Engineer, Web Team

Company behind Avalanche, a network of interconnected blockchains.

- Designed the TypeScript monorepo behind all Web team apps: shared packages, serverless APIs.
- Led engineering of the Core dApp, Subnet Explorer, bridges, and staking tools on a shared UI library.
- Founded and managed the Web team: grew it to 10 engineers, ran 1:1s and reviews, set the roadmap.
- Awarded by peers for outstanding dedication, resilience, adaptability, and performance under pressure.

2017 - 2021

Earlier Roles

Surjon · Founding Software Engineer · Angel-backed feedback platform for surgical residents.

iRacing · Frontend Software Engineer · React + Electron racing sim dashboard.

Wayfair · Software Engineer · Promotions team. Cut page load time by 700ms.

Skills

AI and agents	AI SDK, OpenRouter, Mastra, Inngest
Frontend	TypeScript, React, Next.js, TanStack Start, Vite, Tailwind, shadcn/ui, React Query, Zustand
Backend	Node, Bun, Hono, tRPC/oRPC, OpenAPI, Zod, Better Auth, Clerk, Drizzle, Convex
Infra and data	Postgres (Neon, Supabase, pgvector), Redis, Vercel, Cloudflare, AWS ECS, Serverless

Projects

vaut.dev	Private file host for agent output on Cloudflare Workers + R2, with a CLI.
fleetfizz.com	Ships my agent skills, instructions, and CLIs to all my machines in one command.
sbrain	Agent framework for maintaining my LLM wiki.
bambu-print	Agent skill and CLI that turns "print me X" into a finished 3D print.

Speaking

The Future of Multi-Chain dApps · Avalanche Summit, Barcelona — May 2023

Web3 dApp Development Workshop · Avalanche House, Berlin — May 2022

Web3 Frontend Design · Subnet Show, YouTube — May 2022

Education

Case Western Reserve University · BA in Psychology, Honors — 2011 - 2015

SUNY Buffalo · Computer Science coursework — 2015 - 2016

Hack Reactor · Advanced Software Engineering Immersive — 2016

Personal

Ski, travel, 3D print, learn. Creator at my core.
